MEMORANDUM OF CONVERSATION

*What re
AEC progress*

PARTICIPANTS:

Mr. William Goodman, State/OC/S;
Clyde Snider, State/INR/CS;

25X1A

[REDACTED] CIA/Commo

25X1A

[REDACTED] CIA/OS; and

25X1A

[REDACTED] CIA/OCR/BR

9 December 1963

SUBJECT:

Facsimile Transmission Between Department
of State and CIA

1. Mr. Goodman raised the question as to what purpose was

to be served by the installation of facsimile transmission equipment between

the Department and CIA. It was explained that by such a system CIA hoped

25X6

to increase the rapidity of the [REDACTED] to the Department at the

same time decreasing the burden placed upon the CIA Courier Service for

special deliveries to the Department.

25X1A

2.

[REDACTED] then outlined the space and personnel

requirements that would be needed to make such an installation conform to

CIA security regulations. They were:

- a. The KG-13 would have to be secured in a manner similar to

← that required for a Signal Center, i.e., 24 hour occupancy with

25X1A

controlled access or a [REDACTED]

25X1A

- b. Secured lines between the KG-13 and the ancillary (probably

← will be Xerox).

- 2 -

- c. Minimum of 100 square feet of space needed to house *all*
including X-ray, working space, and
equipment (KG-13 is about 5' high, 3' deep, and 20" *KG-13*

wide)

- d. KG-13 is to be separated from ancillary by at least *7*
a partition and the lines running from the KG-13 to the printer
(ancillary) must be secured.

25X1A

- e. Personnel activating and deactivating KG-13 must have [REDACTED]

clearance through Top Secret; personnel operating ancillary

25X1A

need not have [REDACTED] clearance.

- f. Screening, which would cost approximately \$3,000 - \$4,000 ,
might or might not be necessary. This factor still to be
determined. *- when ?*

25X1A

- g. Antennae with [REDACTED] down to equipment required --
therefore the 7th floor would be most desirable location in
State.

- h. CIA will supply total equipment. KG-13 will be maintained by
Commo, CIA and we will procure contract for maintenance

25X1A

[REDACTED] Bids are going out

25X1A

[REDACTED] the KG-13's are already

purchased.

- i. CIA hopes to install equipment during this fiscal year--
preferably March or April.

- 3 -

25X1A

3. It is understood that this equipment is capable of

25X1A

25X1A

therefore the

new equipment will produce material somewhat inferior in quality.

4. Mr. Goodman asked that CIA put its requirements in writing, 25X1A

including the need for document control, and said that

25X1A

would prepare such a paper. State will reply in

writing..
